RE: Unified Planning Work Program Letter of Support

Mr. Baker;

On behalf of the Winooski City Council, I am pleased to offer our support to the City's application for funding through the Unified Planning Work Program. The Winooski City Council supports the development of plans that will provide quantitative data and recommendations to help improve the City's operations. The development of a parking inventory, analysis, and management plan will provide valuable information to inform the City's decision-making process.

With the submission of this application, the City is committed to provide the funding and staff resources necessary to complete this effort. The City is also committed to implementing the recommendations provided through this planning effort as appropriate. The development of this plan will support the implementation of the City's Master Plan, Transportation Plan, and other planning initiatives.

Thank you for considering our application and we appreciate all the support that is offered by you and the staff of the Regional Planning Commission.

Warm Regards,

Kristine Lott, Mayor
City of Winooski
